## PROJECTS

Personal Portfolio                                              Feb. 2022
Create a portfolio using a framework that I have not used before (React). This is to develop my skills using new frameworks. I also familiarized myself using continuous integration using Cloudflare pages to automatically deploy changes made to the portfolio.
Used stack: React, JavaScript, SCSS, Cloudflare pages

Custom web app for construction company                        2020 - 2021
This project was to create a custom website for our final project in college. This custom website was used to track employee schedules, tools and truck locations. It also included an admin page for managing employee credentials and permissions.
Used stack: ASP.NET, Razor pages, Bootstrap, MySQL
